So far this year you have taken $550,000 of the $658,425 the business earned for you (84%). This is the figure a buyer or a lender starts from (seller's discretionary earnings).

How much cash is above your minimum

After every bill, loan and mortgage payment, household cost and estimated tax payment in the next 13 weeks, business and household cash together is lowest at $1,174,046 in the week of January 9, 2027. Keeping a minimum liquidity cushion of $556,000, about $618,000 sits above it and is available for savings, investing or a larger purchase. Owner draws move money between the two sets of books, so they do not change this total. This is a cash test, not a measure of earnings.

Taxes to set aside

The profit flows to your personal return, so the tax is yours to pay, even on profit left in the business. On $786,141 of profit so far this year, about $275,149 (35%) is owed; $188,000 has been paid in estimates, leaving $87,149. At this pace the full year comes to about $943,369 of profit and $330,179 of tax. Paying the estimates on time avoids an underpayment penalty and a large bill in April. Keep the set-aside in a separate savings account. Estimates already paid include those paid from your household books.

Estimates for planning. Call us before a large distribution.
